PHASE 4

Phase 4: Project Planning Phase

Global Olympic Sports Performance Analysis

Goal

Break the work into steps, set up the project, and get the dataset in place.

What we do in this phase

- Download the "120 Years of Olympic History" dataset from Kaggle
- Review the fields: athlete, NOC, sport, event, medal, year, season, city
- Create the repository structure and keep raw data separate
- Set the order of work and a timeline for each phase

Deliverable

Project plan and raw dataset
